Los Angeles County Citizens Redistricting Commission

Public Comment for December 10 CRC Special Meeting

To the Commissioners,

I am writing in support of returning to Map B2 so that all the marina "communities of interest" can stay together under the leadership of Supervisor Janice Hahn. She has been instrumental in helping protect the interrelated eco system between these communities including wildlife, birdlife and coastal public access.

If Map B2 is no longer in consideration, then I support map B4 because it keeps Marina del Rey and the Ballona Wetlands together in one district. These two areas are integrally related and it is imperative they are treated as one greater eco system. If they are split into two districts with two Supervisors, it will be that much more difficult to protect these wonderful areas.

Sincerely, David Barish
